## **METEOR Solar LED is the Winner of Innovative Green Design Awards (igda) competition in NYC**

**May 2009**

LOS Corporation-Meteor Lighting proudly announces that we are the winner, in the Lighting category, of New York House magazine's inaugural Innovative Green Design Awards (igda) competition.

New York House is a monthly magazine dedicated to green and sustainable living. The winners of this competition represent those utilizing the greenest materials, most sustainable manufacturing methods, producing the most energy efficient, innovative, minimal carbon footprint, and best-looking designs in each category, from soft goods to lighting and appliances.

Starting from June 1, the winners of the IDGA competition will be featured on the [New York House](#) website. Meteor Lighting is honored to be one of these winners and will be noted on the website, as well as seen in the magazine and also on regional TV.

To celebrate this event, New York House Magazine will host a Green Design Networking Reception in conjunction with Green Buildings NY, on Tuesday, June 16 in New York City, at the Jacob K. Javits Convention Center. Our sales rep in NYC-SimBio will be attending this event and accept the award on our behalf. Moreover, 600+ Meteor postcards and 100 + Meteor brochures will be available at their trade show booth for the duration of the event

as well as to give away during the reception

Meteor Lighting is really pleased to share this good news with you and believe that by doing so, we will let more and more people become familiar with us and our products. Hopefully, all of these marketing activities will help you on promoting Meteor solar LED lights.
