## Meteor 2009 New Product Debuted

**April 2009**  
**LD+A**

Meteor introduces new solar-powered LED lights, including the SH-180 linear paver lights and SH-200 mini ground lights. The SH-180C is a new linear LED paver lighting unit designed for the decoration and delineation of exterior spaces. It contains a large 15-piece solar LED array, and its 4-in. by 8-in. rectangular shape is identical in size to bricks commonly used in construction, which allows for easy installation and replacement. The 2.36-in. diameter SH-200 mini ground light is the smallest of its type on the market. It can serve as an illuminated marker, and is also easily installable in outdoor applications. Meteor solar LED paver/ground light units are available in five colors: red, green, blue, amber and white. They are self-contained and self-powered. Constructed with stainless steel, the units have a high load tolerance, meet the requirements for IP68 certification and have a 7-10 year lifespan ultra-capacitor power storage capacity.
