

# DOT SERIES

METEOR

## **DESIGN PHILOSOPHY**

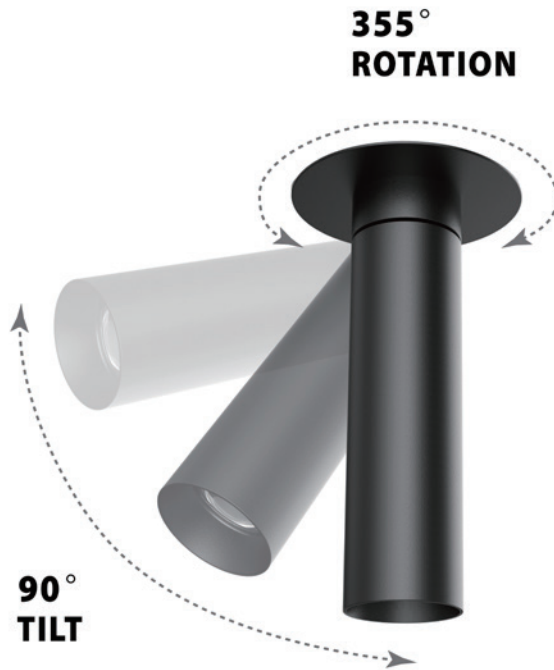

The Dot series are a range of small aperture microcylinders, that are minimal, elegant and decorative. These petite cylinders blend seamlessly in a space, shying away from the limelight and instead, helping illuminate the important things.

## **MAKING A POINT WITH THE DOT**

Available in three micro sizes, and thousands of configurable options, the Dot series are well suited for a variety of indoor applications. From direct lighting to wall lighting, the Dot can do it all.

## **POINT & LIGHT**

The Dot 2.5 is available in a Surface Adjustable Mount with 355-degree rotation and 90-degree tilt. Just point and light up art, living walls, branding and anything that captures your imagination.

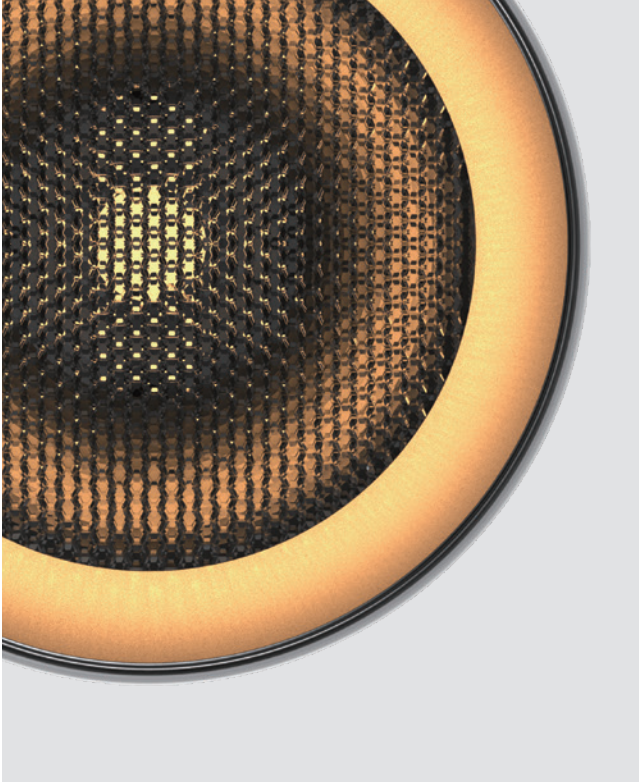

# FORM

**GO
