

LANCÉ

SERIES

METEOR

DESIGN PHILOSOPHY

The Lance series follows our Pure Brilliance philosophy. We wanted to bring everlasting structure to buildings and a luminaire that becomes part of the architectural element.

Grazing brilliant surfaces and textures. The luminaire itself is a perfect balance between decorative and functional.

**DESIGNED FOR
TIMELESS EXTERIORS**

Make a bold architectural statement with the Lance, a bi-directional surface wall luminaire that brings ever-astling structure and accentuated textures.

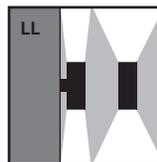

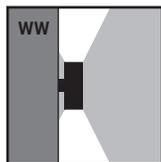

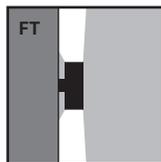

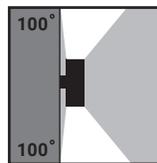

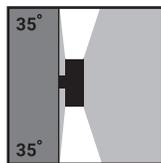

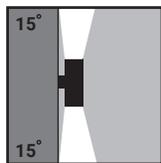

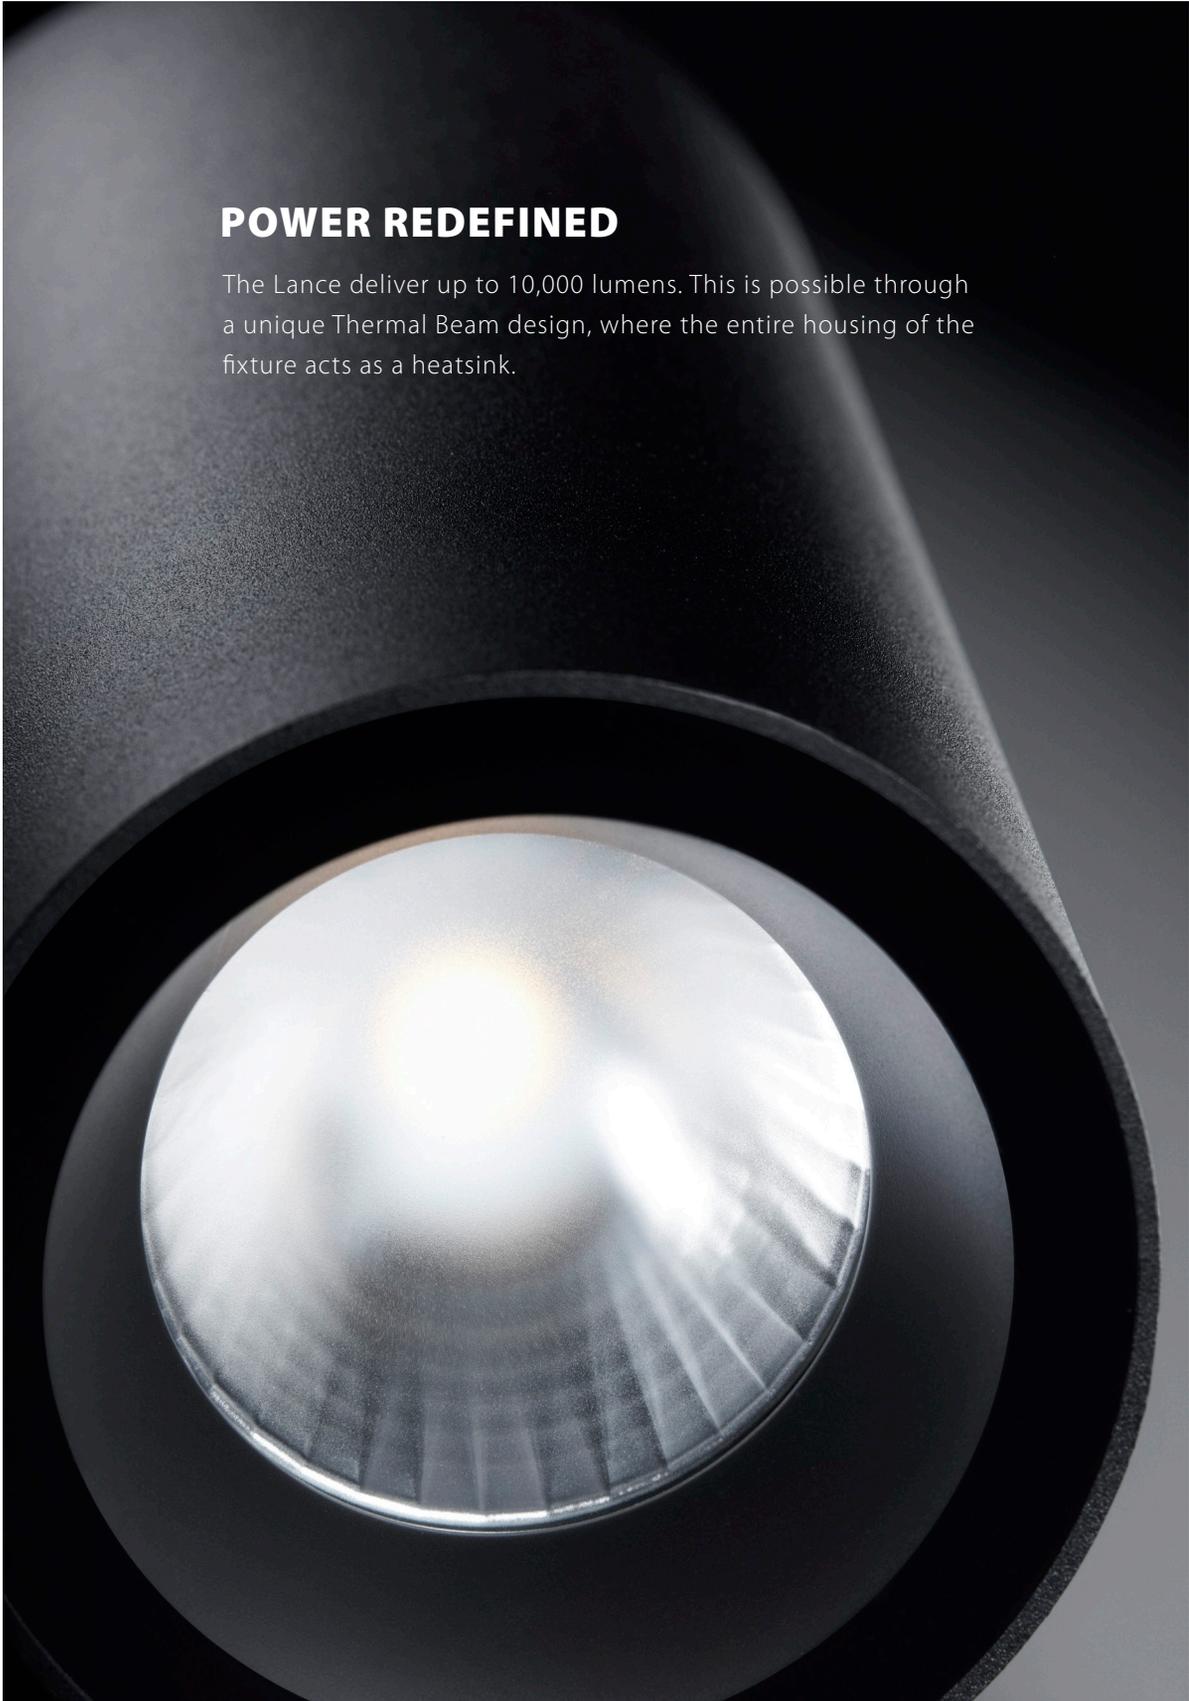

BEAM IT UP

No matter the application, the Lance is configurable in variety of options from 15° to 100°. And available with forward throw, wall wash and linear optics.

A close-up, high-angle photograph of a circular LED light fixture. The central lens is illuminated, creating a bright, warm glow that fades into the dark, textured housing of the fixture. The lighting is dramatic, highlighting the concentric circles of the lens and the surrounding housing.

POWER REDEFINED

The Lance deliver up to 10,000 lumens. This is possible through a unique Thermal Beam design, where the entire housing of the fixture acts as a heatsink.

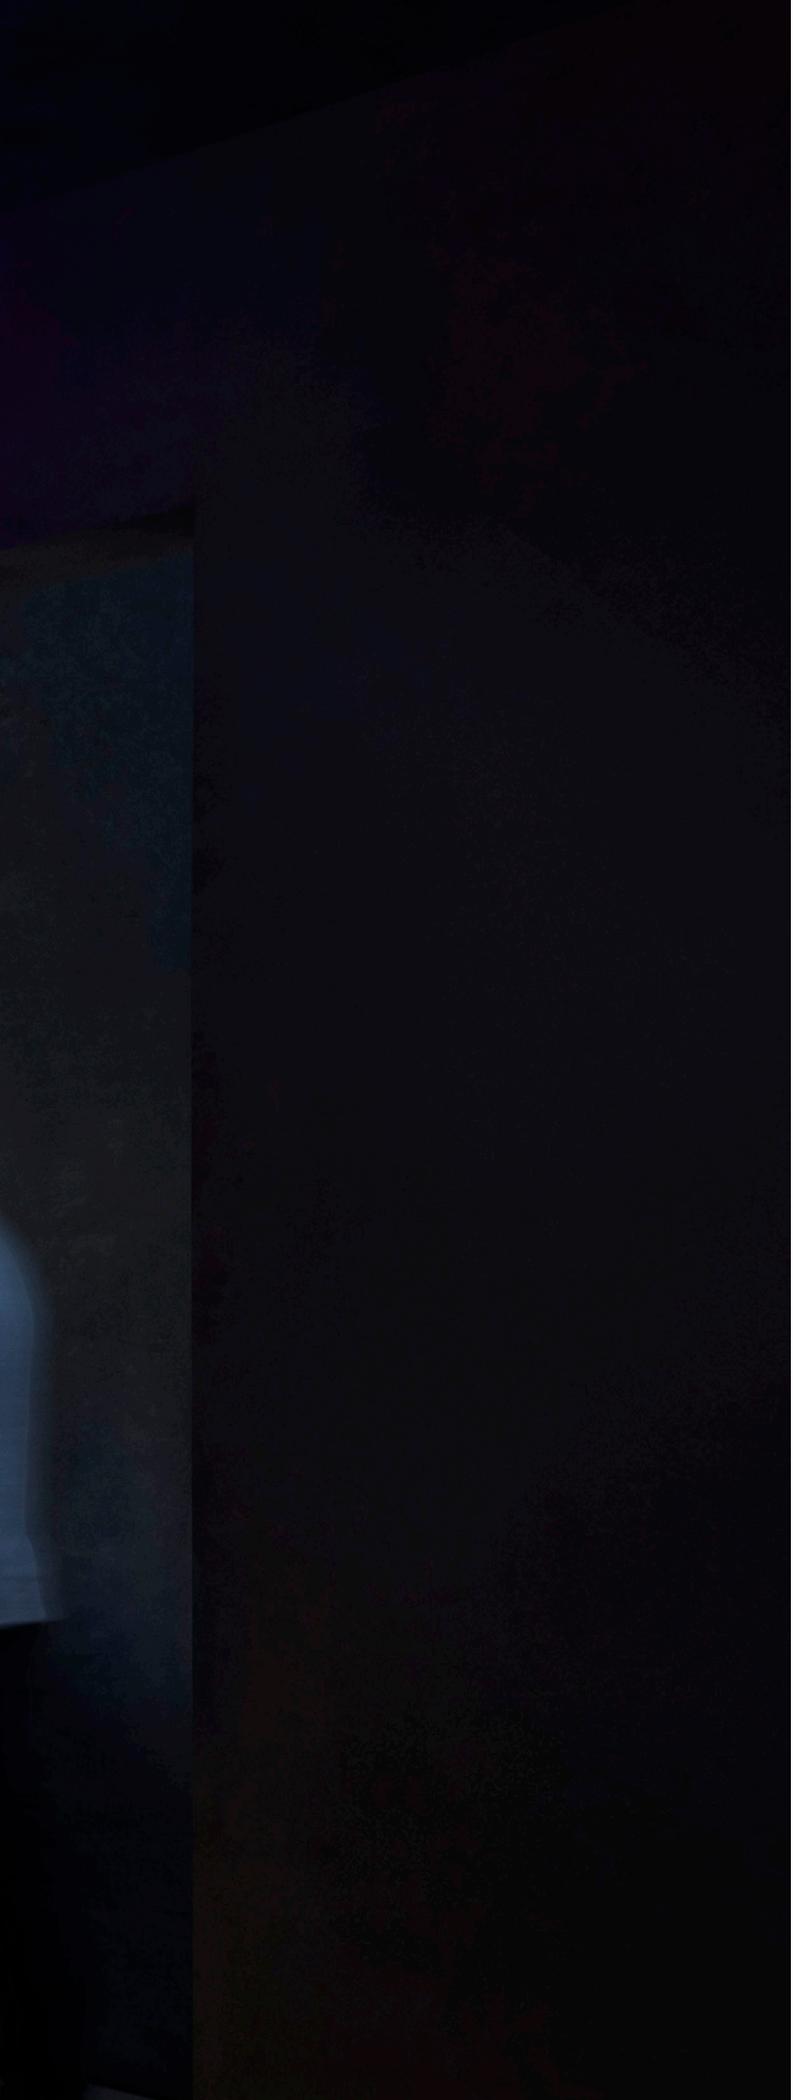

MANAGING THE ELEMENTS

Built to withstand the harshest environments, the Lance is IP 65, Wet Location Listed and is designed for exterior usage in mind. Which means everything is built to last inside and out.

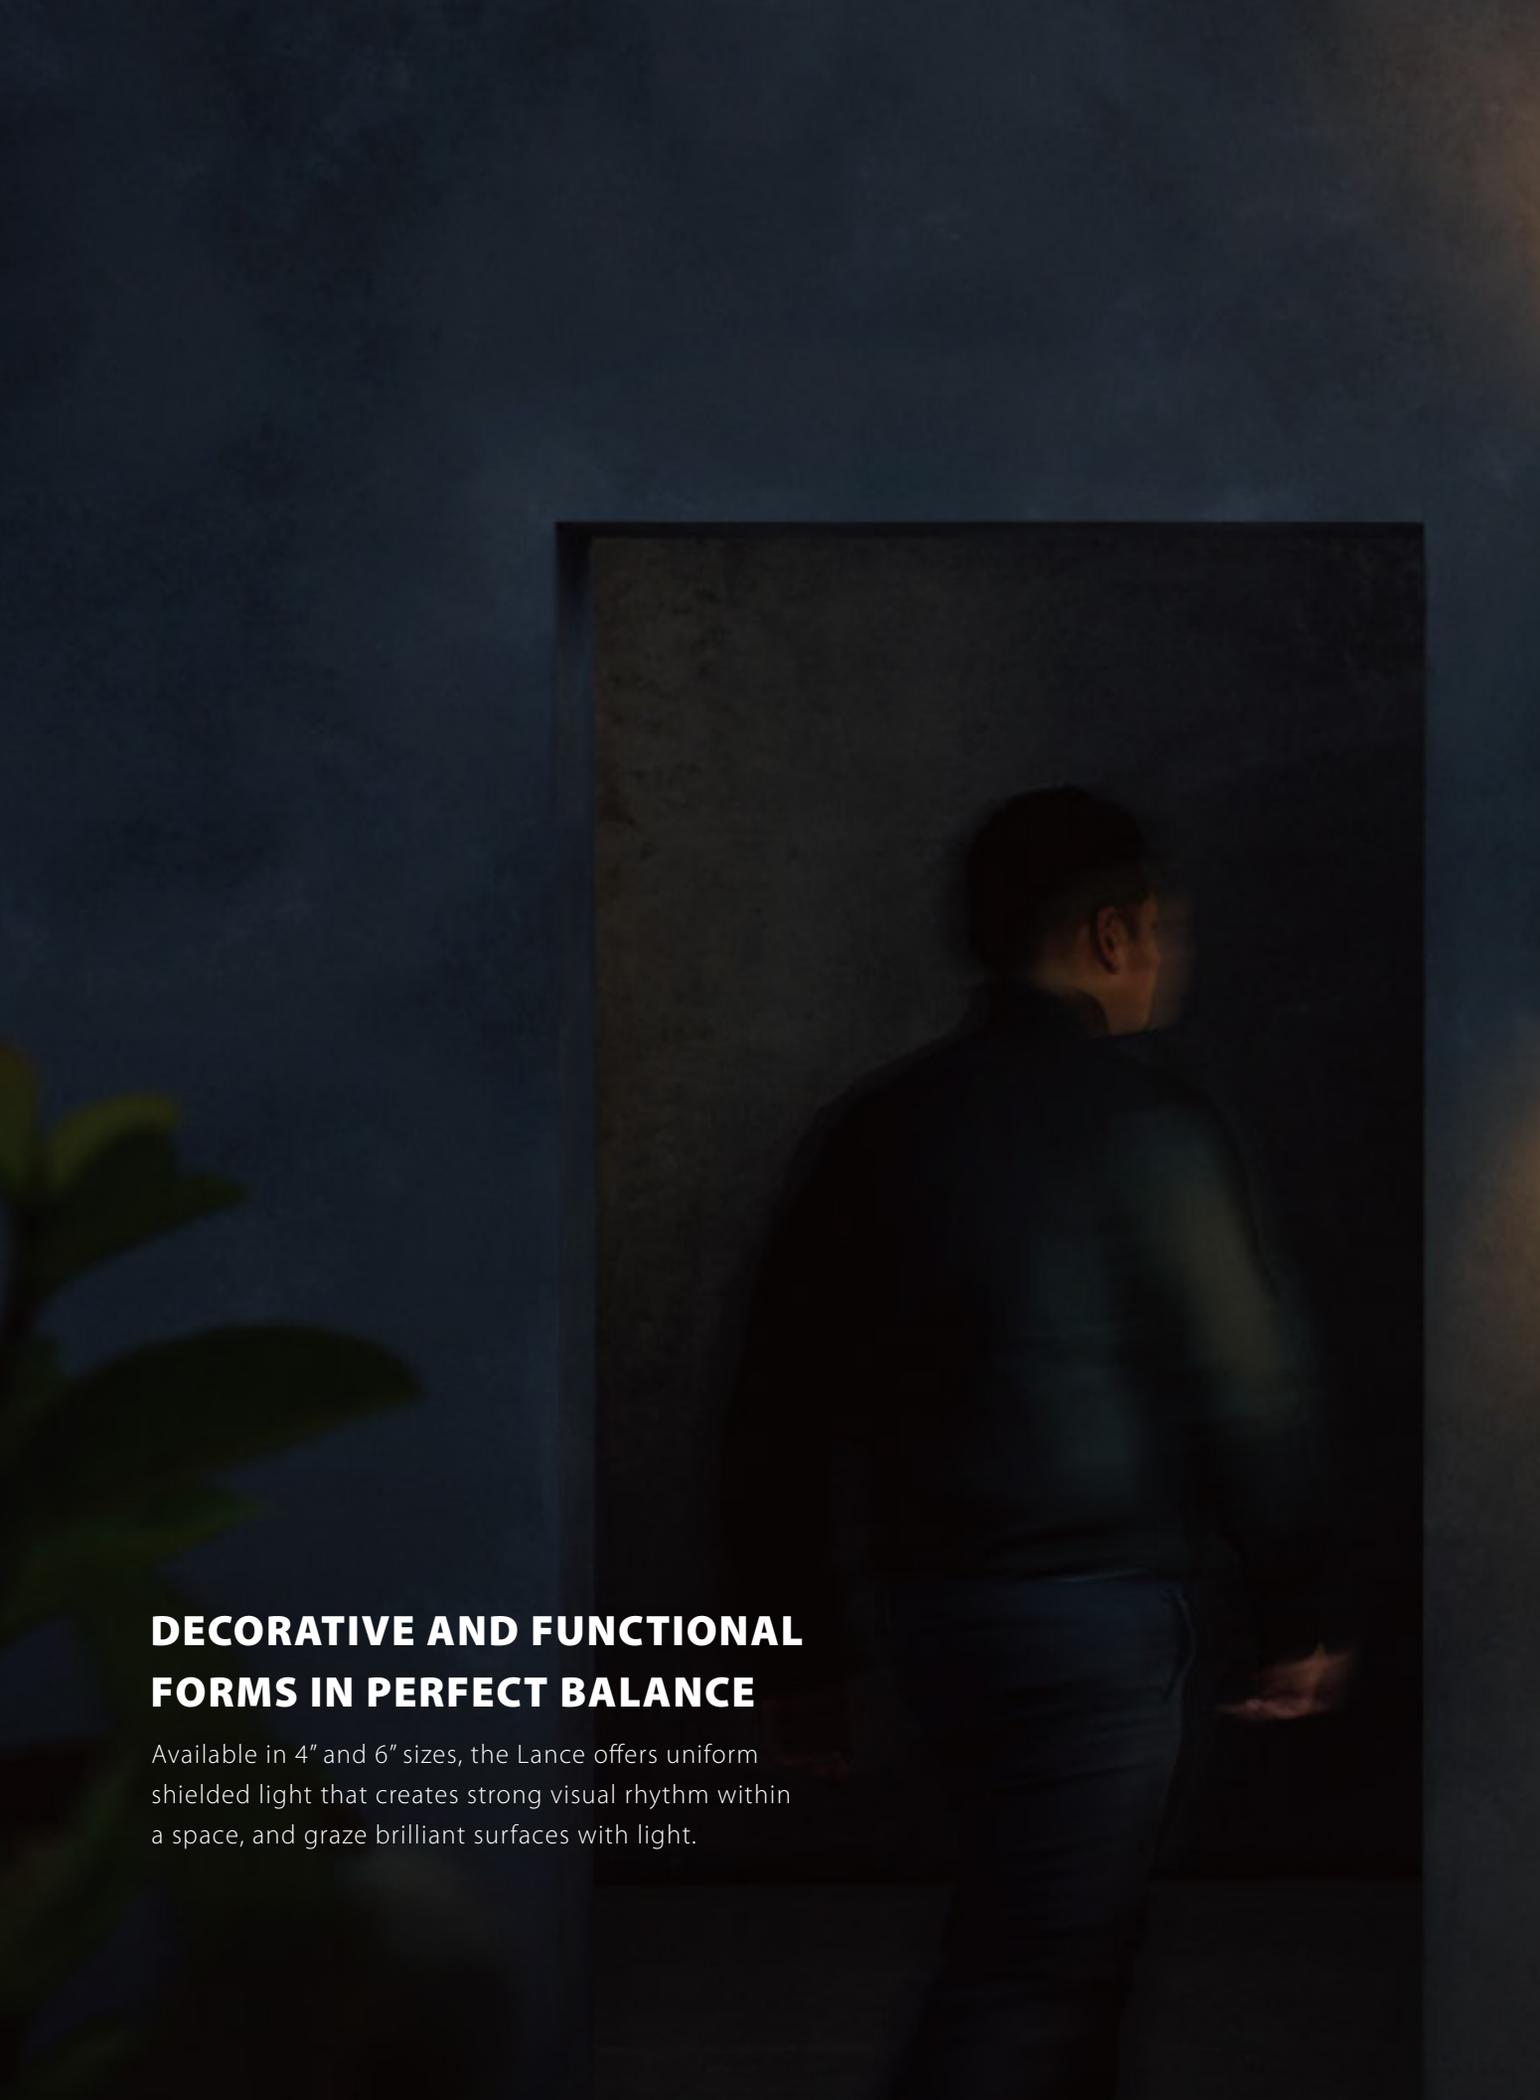

COLOR CHANGING AT YOUR FINGERTIPS

The Lance 6 is available in a very rare W+RGB Direct/Indirect configuration. It can also be paired with a RGB uplight and True White downlight. Arranged individually or in groups, they create interesting design elements that bring unlimited possibilities to transform your space.

A person is seen from behind, standing in a dark room and looking at a large, illuminated rectangular panel. The panel is the primary light source, casting a soft glow on the person's back and the surrounding walls. The overall atmosphere is dark and moody, with the light from the panel creating a strong visual rhythm and highlighting the textures of the walls and the person's clothing. The person is wearing a dark jacket and pants. The panel they are looking at is a large, rectangular light fixture, likely the 'Lance' mentioned in the text. The background is a dark, textured wall, and there is a hint of a plant on the left side of the frame.

DECORATIVE AND FUNCTIONAL FORMS IN PERFECT BALANCE

Available in 4" and 6" sizes, the Lance offers uniform shielded light that creates strong visual rhythm within a space, and graze brilliant surfaces with light.
