BOLLARDS

GOOD GREEN DESIGN PRINCIPLES

Meteor outdoor solar luminaires are installed in a variety of outdoor landscapes to provide aesthetic accent and way-finding illumination. We understand that every product will be subject to hard conditions, physical stress and temperature fluctuations. That is why good design and functional quality is embedded in every product.

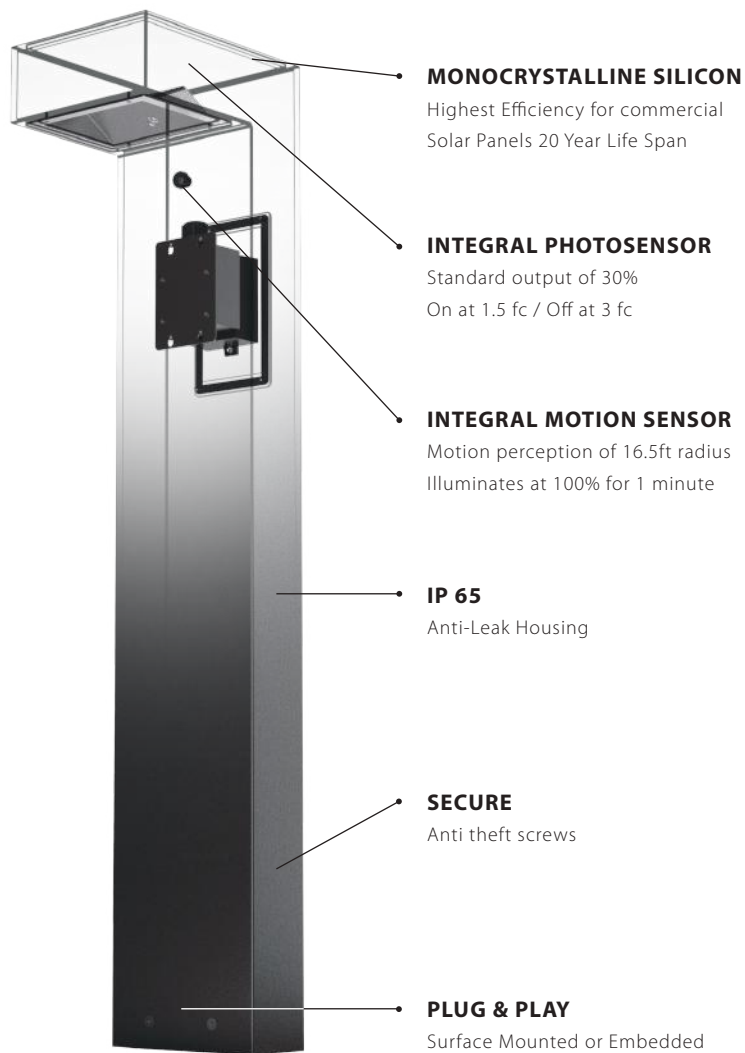

CUTTING-EDGE SOLAR WAYFINDING LUMINAIRES

Plug & Play illuminating bollards that are architectural, functional and green renewable.

The image shows three black, cylindrical solar LED bollards standing on a paved sidewalk at night. Each bollard has a glowing rectangular light fixture at the top. In the background, there is a modern building with a glass facade and a metal staircase with railings. The scene is dimly lit, with the primary light source being the bollards themselves.

SOLAR LED BOLLARDS

Our smart bollards come with an integral photosensor and motion sensor that prolongs battery and product life. It automatically turns on/off based on sunlight and can sense its surroundings through infrared. Built with longevity and convenience in mind, the bollards are not AC powered, have no wiring and is a simple plug and play installation.

CHARGING TIME: ☀️ 2-3 hours ☂️ 5-8 hours
OPERATION TIME: Minimum of 12 hours
