DMX REQUIREMENTS

The REV Flex 4 LED fixture with DMX is a **single channel dmx** unit.

When placing an order, please indicate DMX address. (The DMX address will be listed on the back of the fixture.)

The LED fixture provides RJ45 socket or Phoenix Connector to connect. (DMX cable **not** included.)

The final fixture should be terminated by the use of a DMX terminator (by others).

| CONNECTION | RJ45 (CAT5e) |
|------------|-----------------------------------|
| Common | WHITE/BROWN(PIN7) & BROWN (PIN 8) |
| Signal - | ORANGE (PIN 2) |
| Signal + | WHITE/ORANGE (PIN 1) |

COMPATIBLE DMX CABLING LIST

DMX uses a cable consisting of two twisted pairs plus a shield to carry data. The cable must be specifically impedance matched for the digital DMX signal, meaning that microphone cable or other non-rated cable **must not be used to carry DMX**. Network cable (Cat5, 5e or 6 cable) may be used to carry DMX in an installation; however special consideration must be given to shielding and termination. Under no circumstances should solid core cable like Cat5 be terminated into a screw down connector.

Meteor recommends the use of Belden 9729 or Belden 9841 for DMX installation. Belden 9729/9841 is a shielded twisted pair cable, which allows for a spare pair for 'out and back' type terminations if needed.
